I. Economical news :

1. Ministry of Work and Social Welfare :

Report from the branch of wages and salaries at beginning of May.

Ministry of Work and Social Welfare, department II/2 issued an intimate report about the situation in the branch of wages and salaries in April and in the first week of May 1949, sign II - 1111/2 - 24/5 - 49 /reviewer Tikalova/ year 1949, series I, number 5, from May 24th 1949.

The report sums up chief experiences which were made by Country National Committees (KNV) - work and social welfare offices.

It is admitted in the introduction that the insufficient activity of wages department was caused by the fact that the departments and offices which were competent before the establishment of KNV have not yet entirely transferred all documents to the now competent departments.

In the paragraph on general questions of wages there are complaints of various cases of so-called black market with work ("šmelinařeni") which are caused partly by black wages paid by managers of factories. Then it is caused partly by workers who make great demands and partly by swindling with achievements and working time (false stakhanovite achievements, work on afflicted conditions, high advances, tips etc) Unequal wages of workmen in different categories and factories are effects of this "black market". This disproportion effects a great indignation, disturbance and decline of the work morale of this part of workmen that has not these benefits. Besides feeling of social injustice, great nationality quarrels among Czech and Slovak workmen and Czech and Greek personnel in "Greek Youth's homes" cause difficulties. After the analysis of these cases, the report describes the arrangements which were made or which are to be made. Stress is laid upon the necessity of deepening of the socialist consciousness among workmen.

There are some proposals for supplement of the present wage notices and decrees in the paragraph on the reminders to wage notices.

In the paragraph on situation in agriculture, there are chiefly pointed out the differences among agricultural workmen which arise from disproportionately high wages of the workmen working in "vykrmna" (=stables for fetting up/porks) where some of them get 10000 Kcs a month.

The original and photo-negatives of this report are enclosed.

- August 15th 1949.

SECRET  
U. S. OFFICIAL

2. Ministry of Work and Social Welfare :  
 Instructions for elaboration of uniform premium distinctions of national corporations and associations for distribution.

Ministry of Work and Social Welfare issued directions for elaboration of uniform premium distinctions of national corporations and associations for distribution.

According to these instructions sent out to competent factories, different factories for public distribution and different associations have to elaborate their own premium distinctions which are approved by the Ministry of Work and Social Welfare after audience of premium committee of ROH I - Union of employees in distribution. Premiums are allowed on probation only for half a year at the latest.

These instructions inform fully of collective premiums to places of sale, premiums for sale of goods which are hard to sell (dead stock's premium) and of efficiency premiums for manually working employees.

The original and photo-negatives enclosed.

- August 15th 1949 .

3. Ministry of Work and Social Welfare :  
 Informations for the Minister of conferences about raising of wage expenses for agricultural workmen.

On ~~24th~~ July 1949 an information report was elaborated in the Ministry of Work and Social Welfare about the result of the conference concerning raising of wages of agricultural workmen by 20 per cent .

These conferences took place between the Minister of Work and Minister of Agriculture. ~~XXXXXX~~ It was June 22nd 1949. The next day (June 23rd) another conference took place among the representatives of both Ministries in a cooperation of the representatives of URO (Central ~~XXXXXX~~ Counsel of Sections), JSCZ (Uniform Czech Agriculturist Federation) and Czechoslovak State farms.

The proposed raising of wages met with general approval under following condition of URO : this raising must not influence the prices of agricultural products and KSC and SOR (Slovak Section Counsel) must approve of it.

The report informs further of the state of permanent (the whole year working) workmen in agriculture (120000) and calculates the raising of the wage expenses in Czech countries (by 360 millions Kcs). 36000 workmen are employed in state farms and the raising will cost 108 millions Kcs. These numbers show private enterprises in agriculture in proportion to state ones.

The report warns against delay of this arrangement which could cause the decline of working morale of agricultural workmen. It could be very fatal during present shortage of labour in agriculture, especially in coming harvest time.

Then it draws attention to unequal wages of Czech countries and Slovakia where wage conditions of agricultural workmen have improved. The further raising of wages would cause a deepening of this inequality .

The copy of the information enclosed.

- August 15th 1949 .

SECRET CONTROL  
 U.S. OFFICIALS ONLY

Approved For Release 2001/12/05 : CIA-RDP83-00415R004900110011-3

4. Agricultural research in Czechoslovakia.

a/ Agricultural research in Czechoslovakia is concentrated in the Federation of experimental agricultural establishments, Prague XIX, Na Cvicisti, 2

b/ State establishment for plants-growing and improving.

The agricultural research in the branch of plants-growing is concentrated in the State Establishment for Plants-growing and Improving, Prague XIX.

The establishment has experimental fields at Doksany n/O, district Litomerice, and at Veltrusy near Kralupy n/Vltava.

c/ Experimental fields at Doksany n/O.

On experimental fields of the State Establishment for Plants-growing and Improving at Doksany n/O, following experiments are realized :

Cross-breeding of wheat :

Purpose : To gain higher quality of corn.

The wheat "Pozehnana-sugarfactory Neratovice" is interbred with the wheat "Polonicum.

"Pozehnana" gives a big output of grains but it is not vitreous.

Results of the crossbreeding will not be known before 1950. If they are positive, the crossbreeding will be realized generally.

Dr Glasnerova who realizes experiments with the crossbreeding of wheat, has at hand as subsidiary assistant a Jewess of German nationality Ilsa Ferber who is said to be a paid confident. She is said to have gone through a certain communistic schooling in USA.

Rotations of crops - strings (alternations):

Purpose : Perfect exploit of the soil changing seeds. It shall be found out in which alternation different products are to be sown in a certain ground. If the result is positive, it shall be introduced generally.

Table of rotations of crops for the five years' plan :

Year	Rotation of crops, number				
	1	2	3	4	5
1949	turnip	clover	oats	wheat	rye
1950	clover	oats	wheat	rye	turnip
1951	oats	wheat	rye	turnip	clover
1952	wheat	rye	turnip	clover	oats
1953	rye	turnip	clover	oats	wheat

SECRET CONTROL

Geonomie :

25X1A

Calculating of the outputs of all products and planning for the year 1953. It is stressed the fodder-plant-growing which shall be more intensive in common with raising of the number of cattle. In the five years' plan this task has been placed on the first place. Calculating of outputs occurs on the base of detailed reports which come from different districts.

Formulary of this questionnaire (Survey of cultures in a district) in original and photonegatives enclosed.

d Experimental fields at Veltrusy.

On the experimental fields at Veltrusy experiments are executed with the growing of dandelion of the sort "Kok-saghyz" which after ten years' growing and improvement by Ing Koskovic contains in its roots a satisfactory quantity of cautchouc. Positive results have appeared this year.

25X1X

5. Small farms shall be nationalized.

The Ministry of Agriculture is preparing great actions in autumn 1949 destined for the requisition of agricultural estates between 15 - 25 hectares. It shall not concern all these estates, nevertheless it shall take possession of a considerable part of them. The reason is the guarantie of these estates for the food-supply the State in case of an alimential crisis or farmers' strike (in supplies).

6. Reorganization of the Czech industry.

25X1A

- a The whole Czechoslovak industry shall be entirely organized from January 1st 1950. The existing organization of the industry is in operation only till December 31st 1949.
- b Reorganization of mechanical and engineering industry - (Up to now : Czechoslovak Mechanical and Engineering Works, Nat. Corp.)  
 The above mentioned branch of the Cz. industry will be reorganized in following way (in accordance with planned industrial reorganization) :
1. Heavy engineering works (Skoda)
  2. Light mechanical and engineering works
  3. Industry for production of cars
  4. Industry producing small articles of everyday use and tools.

c Organization of the industry for production of cars:

The industry for production of cars will be concentrated in the Czechoslovak Automobile and Aerial Factories (CZAL), nat. corp., Prague.

It is divided into operative centres according to the sort of production :

1. The operative centre of the production of cars
2. The operative centre of the production of airplanes
3. The operative centre of the production of motorcycles
4. The operative centre of the production of bicycles  
 (probably together with the operative centre of the motorcycle prod.)
5. The operative centre of the production of the auxiliary materials and parts.

Every operative centre has some concerns which have some branch factories or motor-pools. These motor-pools will be established from private motor-pools which shall be nationalized.

Communist H o r a k was appointed as the general director of the Czechoslovak automobile and aerial factories. He is known only to have arrived two months ago (in June) from USSR. It is not known why he was there. He is told to have been attaché to the Czechoslovak embassy in Moscow.  
 The general director shall have a special substitute for every operative centre  
 Communist Vaclav S k a l a, the present director of the "Czech Factory of Arms" nat. corp. Strakonice, was appointed the substitute of the general director of CZAL for the operative centre motorcycles and bicycles.

The existing director Vaclav Skala was appointed substitute of the general director of Czechoslovak motor-car and aircraft factories (CZAL) for the operative centre motor-cycles and bicycles.

## b CZ Strakonice, nat. corp. factory Strakonice.

Production in the year 1949 till the end of ~~XX~~ July.

	Plan 1949	Production till July 31th	%
CZ 125 motor-cycles	+ 27000	17105	108
Obrabeci stroje (fashioning machine)	380	194	107,9
Veloretezy (velochains)	2880000	1689588	102
Motors CZ 125	<del>XX</del> 2000	1084	198,5
Volnobezky (free-wheels)	160000	89062	97,8
Predni naboje kol	++ 4000	2491	138,3
Electric motor horns	60000	34784	101,1
Magdynamo	4000	1334	80
Slapatka na kola	250000	137208	95,6
x Vyterak vz. 47	+++ 6000	8185	103
Magazine 017A	++ 88000	3365	33,6
Magazine 017B	+++ 10000	531	---
Magazine 015		14000	---
Pistol 6,35	20000	9566	85,4
Chranitko musky vz. 24	+++ 200000	215000	107,5

x A rod used for cleaning a barrel of a gun.

Notes: ++ In the original report 30.000 pieces  
 ++ In the plan from May only. The number of the production asserted in the information-24919 is probably a mistake.  
 +++ By the "vyterak" the production has begun in the June only for the delayed delivery of material.  
 By the magazine 017A planned for the second half-year only (017B also)  
 By the "chranitko musky" the production has begun in the June only for the delayed delivery of material.

The production of "vyterak" model 98N, (100000 pieces planned for the second half-year) has not begun yet for the delayed delivery of material.

The production of the supplementary parts in metric tons :

The plan filled on 102,3 % Till the end of July made 121,9 metric tons.

The production of motor-chains in meters :

The plan filled on 103,5 % Till July 31st 1949 170247 m.

20.  
 SECRET CONTROL  
 U. S. OFFICIALS ONLY

Situation in material :Section moto :

Need of nonferrous metals (or of the aluminium only):

For the rest of the year 1949 ..... 76000 kg .

Alloted only ..... 18000 kg .

It means :If the nonferrous metals are the matter, the material for 5000 motor-cycles is missing.

If the aluminium is the matter, the material for 8000 motor-cycles is missing.

Section "retizkarna" (chains) :

This year's allotment of the high class cold rolled strips will be exhausted till the end of October. The only deliverance will be if the allotment for the year 1950 comes till the end of October, 220 tons at least.

Cold rolled strips were ordered in Belgium but it has not come yet.

CZ has 1615 tons of cold rolled strips in this order.

c CZ Strakonice, nat. corp., factory Uhersky Brod :

The arms production till the end of July 1949:

	Plan 1949	Production June	Production July	Total from the beginn.	%
*Brokovy" (shot) Tommy-gun	5250	1206	---	5590	106,1
Air-gun 802	14000	---	---	20580	147
Air-gun 803 civil	14000	5032	---	5131	36,7
Air-gun 803 military	10000	---	1843	1843*	92,1
Tommy-gun civil OL5H	9500	---	---	10188	107
Tommy-gun OL7 A	30000	200	74	312	---
Tommy-gun OL7 B	10000	---	---	---	---
Loading link (nab. clanek) MGL31	990000	42000	36590	1036590	---

## Notes:

The numbers in the column 4 mean the total production in the year 1949 till the end of July.

\*The production of the air-gun 803 military has not begun until July.

By the shot (brokovy) tommy-guns meant the type 812, 816 and 820 together.

d CZ Strakonice, nat. corp., factory Eska Cheb.

Factory Eska Cheb employs 40 Greek boys, dragged of by partisans; they will become apprentices.

15.8.1949. (All news from CZ Strakonice).

19. "Ceskoslovenské závody energetické", electric works Brodce nad Sazavou:

In July produced by water drive ..... 54090kWh = 133 %  
 From January 1st till July 31st 1949 produced ..... 428080kWh = 80,08 %

Source : 15.8.1949.

20. Iron-works at Dvur Kralové : Destruction of a new ..... "drapak".

Sweden delivered to Czechoslovakia a new "drapak" in a value 6 millions Kcs, for pits in Ostrava. It was transported in a special waggon which should be sent back in a fixed time.

To keep this term, it was taken to pieces and loaded in three normal waggons.

These three waggons were transported by mistake to the iron-works at Dvur Kralové near Bratru. There it was broken under ..... "buchar" as rubbish material (odpadovy m.).

In inquiry if it was a mistake or sabotage, the accused employee defended himself against the accusation. He said he could not know that it had been a new machine because it happens often in the last time that new machines are sent as ..... "zmetky" under ..... "buchar" from different factories. 25X1X

21. Free market: Essential reduction of prices :

At the end of June prices of some articles in free market were reduced remarkably. (E.g. The camera Maroma from 10500 Kcs to 5500 Kcs.)

Reason for this reduction was a very great decline of interest in buying in free market.

## II. Economical news :

### 3. Mining and Metallurgy Company, N. C., factory VAMBERK :

The above mentioned factory is a branch-factory of Mining and Metallurgy Company / Banská a hutní společnost/ N. C., PRAHA. Company directorate is in PRAHA II, Na Porici 26.

Mining and Metallurgy ~~XXXXXX~~ Company, N. C., PRAHA, has following works : BOHUMIN, ČESKÁ VES u Jesenika, ČESKÝ BUDEJOVICE, ČESKÝ TESIN, FRYDEK-MISTEK, KAMENNA, LIŠKOVEC u Frydku, MALÁ MORÁVKA, NOVÝ BOHUMÍN, post-office BOHUMÍN, OLOMOUČ, PRAHA XI, PROSTEJOV, ŠUMPERK, TRINEC and VAMBERK.

Number of employees at VAMBERK : 2.500

Strength of Works Milizia : 400

Accoutrement of the Works Milizia : Bren-guns, Tommy-guns, pistols.

Guard is kept day and night.

Day-guard : 15 men outside and in sections of the factory together

Night-guard : 20 men, 3 members of SNB and 4 factory watchmen with do

Director of the factory at VAMBERK : Engineer MALÝ - communist

Manufacture : wire, barbed wire, electrical copper wire, steel wire, electrodes, chains of all sort/ for cars, cranes, ships etc/, ball-bearings, axle-trees

Manufacture in closed sections :

infantry obstacles  
parts of artillery-grenades  
armour-plates, tank-caterpillars  
hardening metals by using special acids

Work : There are two shifts.

----- Three shifts in closed sections.

Source :  
Comments: Report gives a full picture of a factory. As far as production is  
mentioned it is necessary to add that chains and barbed wire was  
of chief products and especially ELECTRODES. Those were manufacture  
here in license (from Sweden) and were of the best quality in Czecho  
(The same product of Vitkovice was far behind). Banska-Hutni had a  
special license contract with the Swedish concern allowing Banska  
to sell those electrodes (which could prove to be competition even  
in West) only in the Eastern Europe under some specific conditions  
and limitations.  
Barbed wire was sold especially to Brazil (1947) and to Yugoslavia.  
production of ball bearing is insignificant (if any).

#### 4. SVIT, N. C., GOTTWALDOV :

The former title of the above works was BATA - ZLIN.

## I. Economical news.

### L. Automobile industry :

#### a/ Operative number of the production :

Operative number 161 - trucks  
Operative number 162 - bus and trolley-bus  
Operative number 163 - cars

#### b/ Production and accomplishment of the plan of the year 1949 till the end of July :

##### Trucks - operative number 161 :

	Plan July	Production July	%	Plan 1949	Production 1949	%
Avia Cakovice	46	37	80,4	444	415	93,4
Auto Praga	125	145	116	2400	2405	100,2
Tatra Koprivnice	25	78	312	370	512	138,3
Total (these factories)	196	260	132,5	3214	3332	103,6

Avia Cakovice produces the type 706 R. The plan was not fulfilled for a shortage of labour. 210 workmen are wanted. CNV Prague-North ordered to labour office to transfer 150 workmen from other factories. On the understanding for August the plan was fulfilled to 90,48 % for shortage of labour.

Auto Praga, Liben and Vysekany : The accelerating of the orders for under-carriages (chassies) and crays. The assumption for August: If the assumption of the export is not fulfilled, the production of bus shall be raised (to 110 %) (of trucks)

Tatra Koprivnice: The high fulfilling of the plan: The time of the high fulfilling of the plan is fixed because of the repeat-orders from USSR.  
August: The production will decline because the plan shall be not passed over.

PART II,  
(2 pages)

SECRET CONTROL

SECRET

Bus - Operative number 162 :

	Plan July	Production July	%	Plan 1949	Production 1949	%
Avia Cakovice	42	38	90,5	474	433	91,3
Auto Praga	25	5	20,-	90	85	94,4
These factories total	67	43	64,2	564	518	91,8

Auto Praga: There was not made 20 chassis FNDO (planned for Bulgaria), because the final arrangement was not announced. In return for it there are made trucks.

Trolley-bus - operative number 162 :

	Plan July	Production July	%	Plan 1949	Production 1949	%
Tatra Koprivnice	---	---	---	11	13	118,8
CKD	---	---	---	17	17	100
Skoda Plzen	3	3	100,-	6	6	100,-
These factories total	3	3	100,-	34	36	105,8

Assumption for August : 100 %.

Cars (automobiles) - operative number 163 :

	Plan July	Production July	%	Plan 1949	Production 1949	%
AZ Mlada Boleslav	530	607	114,5	5337	5641	105,6
Let Jinevice	154	286	185,7	2533	2245	88,2
Tatra Koprivnice	75	75	100,-	600	708	118,-
These factories total	759	968	127,4	8470	8594	101,5

Let Jinevice makes chassis Minor.

Assumption for August : The factory promised to fulfil the plan.

Note : The above tables do not give the whole image of automobile production during July; they probably omit some other factories, as it follows from the disagreeing of sums (totals) of numbers planned for the year 1949 in these tables with the totals (sums) of the planned numbers from the Inform report I - LH-16 from August 15th 1949, page 15 & 16.

SECRET CONTROL

Czechoslovak automobile and airplane factories, Nat. Corp., Prague VIII, Ceskomorav-  
ska 397. Management with raw materials.

25X1A

See enclosed original and copy of the circular of general director CZAL, No 32/49 from August 16th 1949, about a makeshift of steel to Tatra, Koprivnice, for export order to USSR. The circular reveals some details about a management with raw materials. According to this circular the supply of important raw materials is so small that single factories are absolutely dependent on deliveries of other factories. If some stoppages happen in these supplies, stoppages happen in production, too.

Further notion from the circular indicates that those stoppages must be removed by a mutual support of single member factories of CZAL, if necessary by a selling off of the asked material or by loan; in this way the stock of these materials decrease in supporting factories.

25X1X

4. TATRA, Nat. Corp., Koprivnice, factory Koprivnice :

Tatra, N. C., Koprivnice got very urgent orders for USSR but it has difficulties with a fulfilment because it did not get a necessary material from United Steel Works, N. C., Prague - Kladno in August 1949. General director of CZAL sent a circular to all member national corporations of CZAL in August 16th 1949. In this circular /No 32/49 / he asks all these factories to support Tatra by necessary material either by selling off or by loan.

List of all raw materials which Tatra wants for the fulfilment of orders for USSR is in the circular.

Original and copy of the circular enclosed.

Corporation for linen manufacture; this corporation unites all factories for manufacture of linen in the area of south-west Bohemia; these factories were named formerly PANAR. The factories shall be separated from factory directory of nat. corp. Panar, Prague I, Provaznicka 13. The seat of new establishment shall be at Klatovy. Factories at Klatovy (Beweka), Ferus, Horha, Josef Lowenstein, Kottal & Stadler, Krcma, Tricla), Janovice n. Uhlavou (Tricla), Nyrsko (Norman), Vimperk (Konopra), Vodnany (Ctvrtnikové), Zilkov (Horejs).

13. Reorganization of Czechoslovak industry.

[REDACTED] a reorganization of Czechoslovak industry, the source states that one of chief causes for frequent changes in organization of the industry is to hinder inimical states from controlling of Czechoslovak industry.

\* report from August 15th 1949.

SOURCE : [REDACTED] November 6th 1949.

Ev. : B, 4

Comments: Source's assumption does not look like a correct one because all changes hinder not only "enemies" in spying but production as well. Frequent changes indicate that first form of horizontal nationalisation did not prove itself too successful and new ways are sought how improve that system. In accordance with radio broadcast in November a development goes from big enterprises to small ones and Prague radio announced that each unit (enterprise) will be independent and care for itself so that common administrative centrals for more enterprises (so called : PODNIKOVA REDITELISTVI) will be abolished.

Matter: Support in steel to Tatra, Koprivnice,  
for export order to USSR.

Carried out: Phone: 828- 51  
Material central office: Line: 258  
Zace.

Time limit of execution: August 22nd 1949

Circular of general director, No. 32/49.

Tatra wants for execution of urgent order to USSR the below mentioned material which should be delivered there by Spojen Ocelarny (United Steel Works) yet in August 1949. The delivery had to be postponed till October 1949; that's why Tatra could not fulfil its delivery obligations to USSR.

In order to face these difficulties, CZAL demand, in conformity with instructions of Ministry of the Industry, managers of its member national corporations for an account to the 22nd inst. at the latest - best with a teletype..... (dálnopis) and by referring to ranking numbers of below mentioned articles - if their establishments could support Tatra and in what quantity with this one or that material in its oppressive situation - either by selling off or by loan. They can offer even approximately equivalent supplementary articles.

Tatra would give back the lent material in October, to the beginning of November at the latest, to factories which will be able to support it.

Tatra is short of this material :-

- 1./ W6H Ø 15 mm ..... 300 kg
- 2./ " Ø 22 mm ..... 800 "
- 3./ " hexangular.. (sestihran) 14 mm... 1000 "
- 4./ " ..... ( " ) 17 mm... 200 "
- 5./ " Ø 9 mm ..... 1349 "
- 6./ Poldi 2518 Ø 12 mm ..... 400 "
- 7./ " " Ø 24 mm ..... 800 "
- 8./ " " Ø 17 mm ..... 300 "
- 9./ " " square 14 mm ..... 800 "
- 10./ Va square 25 mm ..... 250 "
- 11./ " 50 mm ..... 196 "
- 12./ " 90 mm ..... 1000 "
